### **DETAILED ACTION**

The following is a response to the amendment received on July 16, 2005 which has been entered.

#### ***Response to Amendment***

Claims 168-179, 212 and 213 are pending in the application. Claims 1-167, 180-211 and 214-217 are cancelled.

-The objection to claims 173, 179 and 212 have been withdrawn due to applicant correcting, antecedent basis and grammar errors.

-The 112 2<sup>nd</sup> rejection of claims 175, 212 and 213 have been withdrawn due to applicant correcting antecedent basis of some limitations and clarifying indefinite limitations.

#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-In claim 212, lines 19 and 20, the term "process" has been deleted.

#### ***Allowable Subject Matter***

Claims 168-179, 212 and 213 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-(as to claim 168) a transmission system having a gear coding device for encoding an engaged gear to identify the gear independently from an end value of a position sensor active when the gear is engaged by a selector finger in combination with the position sensor used to detect a position of the finger in a selection and shift direction and including all the remaining limitations of claim 168.

-(as to claim 212) a method for controlling a shift mechanism of a transmission by encoding an identity of an engaged gear and according to a predetermined characteristic value, moving a selector finger within a clearance range of the gear end point which allocates the identity of the gear according to a predetermined characteristic allocation value and decoding the identity at predetermined intervals independent of a final value of a position sensor in combination with all the remaining limitations of claim 212.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
